

# Palindromes!!

## Description

As a palindrome lover, ke1vin now has a string  $s$ , and want to divide it into two palindromes, send one as a gift to his friend peter502l6!

## Input

Each test case contains a string  $s$  in one line.

- $1 \leq \|s\| \leq 100000$
- The string  $s$  consists of lowercase english letters.

## Output

For each test case, output `www` if  $s$  can be divided into two palindromes, otherwise, please output `vvvvvv`.

## Sample Input

```
wvvv  
wvvw
```

## Sample Output

```
www  
vvvvvv
```
